

1056 | Self Levelling Crane Forks

The 1056 has been designed to give flexibility when required to move oversized and normal packs of block and bricks as well as palletised goods around site.

This unit is supplied with heavy duty sprung lifting eye allowing automatic levelling of any load being carried.

The unit also comes supplied with net hooks allowing the addition of the CS0003 a load restraint safety net (available as an optional extra).

The CS0003 Safety Restraint Net has been designed specifically for use with crane forks and block grabs.

The net is designed to restrain the load on the equipment and must be gathered as tight as possible around the lifted load to maximize effectiveness.

The net is not designed to catch a falling load or for lifting goods on it's own.

Item Code	Hanging Height (mm)	Width (mm)	Length (mm)	Weight (kg)
CS0003	1600	1500	1500	5

CS0003 | Restraint Net
