

MP200 Scaffold Hoist

Model	MP200
Motor Type	Single Phase
Voltage	110v / 220v
Frequency	50Hz / 60Hz
Power	750w
Max Lifting Capacity	200kg
Cable Length	40m
Lifting Speed	22m/min
Cable Diameter	5mm
Hoist Weight	40kg
Dimensions (mm) (machine)	400 x 400 x 550
Max Cable Length	80m

The All New MP200 110v

This revolutionary approach to scaffold hoists eliminates to of the biggest issues with scaffold hoists.

Conventional scaffold hoists require the machine to be directly above the load, this would normally require the heavy machine to be carried to a point high above the loading and unloading area which can be extremely dangerous for both manual handling and the fact that this handling is all done at height.

The MP200 eliminates this issue by having the capacity to be mounted at the base of the structure and instead, a lightweight transmission arm is mounted at the top.

With this system, the other problem that sometimes occurs, voltage drop, is also dealt with.
